DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 3-14, drawn to a hose, classified in class 428, subclass 36.91.
 - II. Claims 15-18, drawn to a method for producing a hose, classified in class 156, subclass 60.
2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as bonding a prefabricated layer that corresponds to the second layer as claimed to the first layer via an adhesive.
3. A telephone call was made to Edward A. Brown on October 17, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Edward A. Brown requested that a written restriction requirement be issued.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
